# Applied Economics Teaching Resources

*Applied Economics Teaching Resources (AETR)* is an online, open access, and peer-reviewed professional publication series published by the Agricultural and Applied Economics Association (AAEA).

The aim is to provide an inclusive outlet for research, teaching and Extension education scholarship encompassing but not limited to research articles, case studies, classroom games, commentaries, experiential learning, and pedagogy. The goal is to support and advance teaching and Extension education within the scholarly areas of agricultural and applied economics, and agribusiness economics and management. AETR seeks to publish articles that are diverse in both scope and authorship. It serves as a platform for addressing and contributing to our understanding of important societal issues, including inequality and discrimination, as well as how shifts in pedagogy (e.g., growing reliance on remote and hybrid learning modalities) may impact accessibility and inclusion.

AETR welcomes submissions on:

1. Teaching and Extension education scholarship and research
2. Classroom and field educational innovation (e.g. classroom games, online teaching tools, Extension applications, and experiential learning activities, and other interactive learning innovations)
3. Case Studies in all areas of applied and agricultural economics, and agribusiness economics and management
4. Teaching and education commentaries (e.g. notes on pedagogy, evaluations of teaching effectiveness, evaluation and review of applied economics textbooks, curriculum development and educational methodology).
